A man in military combat gear, including a camouflage jacket and a cap, stands in a desert-like environment. The image is dark and moody, with the man's face and upper body being the primary focus. The background shows some blurred structures and trees.

COMBAT TSHIRT

Modern army combat t-shirts are made with a 60/40 or 50/50 cotton and nylon blend of special materials that help insulate the skin when exposed to high temperatures such as fire and explosions. Unlike polyester or "polypropylene", the resulting blend does not melt on the skin, thereby reducing burn injuries.

Nearly all army combat shirts feature Non-Fusible/Drop Cordura Baselayer fabric to cover the body. Unlike heavy Nomex garments, this extremely light and extra comfortable body fabric is not only durable but also breathable to the skin, increasing airflow between the skin and the fabric, wicking sweat away.

ARES's most important issue is customer satisfaction and acts with the principle of 100% customer satisfaction. Thanks to its quality guarantee, it has been entitled to receive the ISO 1 0002: 2004 Customer Satisfaction System Certificates, which are revealed with the ISO 9001: 2008 Quality Management System.

MILITARY COMBAT TSHIRT RGD-Mct01

A man in military gear, including a helmet and a camouflage softshell jacket, stands in a desert-like environment. The entire image has a red color overlay. The jacket features a high collar, multiple pockets with zippers, and a durable-looking fabric.

The Softshell Tactical Fleece Jacket offers a wind resistant and warm soft fleece that is more durable than a conventional fleece lining. It features abrasion resistant collars, shoulders and elbows to resist daily wear.

Chest pockets work with the Spare Belt System to give you quick access to your side arm or accessories.

Side zippers and doors provide quick access to your base layer and act as a quick vent option to keep you cool during climate change.

ARES's most important issue is customer satisfaction and acts with the principle of 100% customer satisfaction. Thanks to its quality guarantee, it has been entitled to receive the ISO 10002: 2004 Customer Satisfaction System

MILITRAY SLEEPING BAG

NGD MILITARY SLEEPING BAG maintains our body temperature by heating the air trapped inside the suit with the heat of our body.

We produce models that can be opened and closed with a zipper on the right or left side, as well as model sleeping bags with zipper in the middle.

Some of our models can be fully opened and become normal blankets. You can choose right or left when buying the zippered overalls from the right or left side.

If the overalls in this way are zippered on the left, they should be indicated as "Left" or "Left Zipper", if they are zippered on the right, they should be indicated as "Right" or "Right Zipper". Some of our overalls also have an "L" and "R" shaped indicator. But this is not a right-left indicator.

This indicator "L" indicates long, "R" indicates Regular length. Long versions are overalls made for tall people. As insulation, we produce synthetic filled and goose down filled sleeping bags.

Rating Low: -17°C

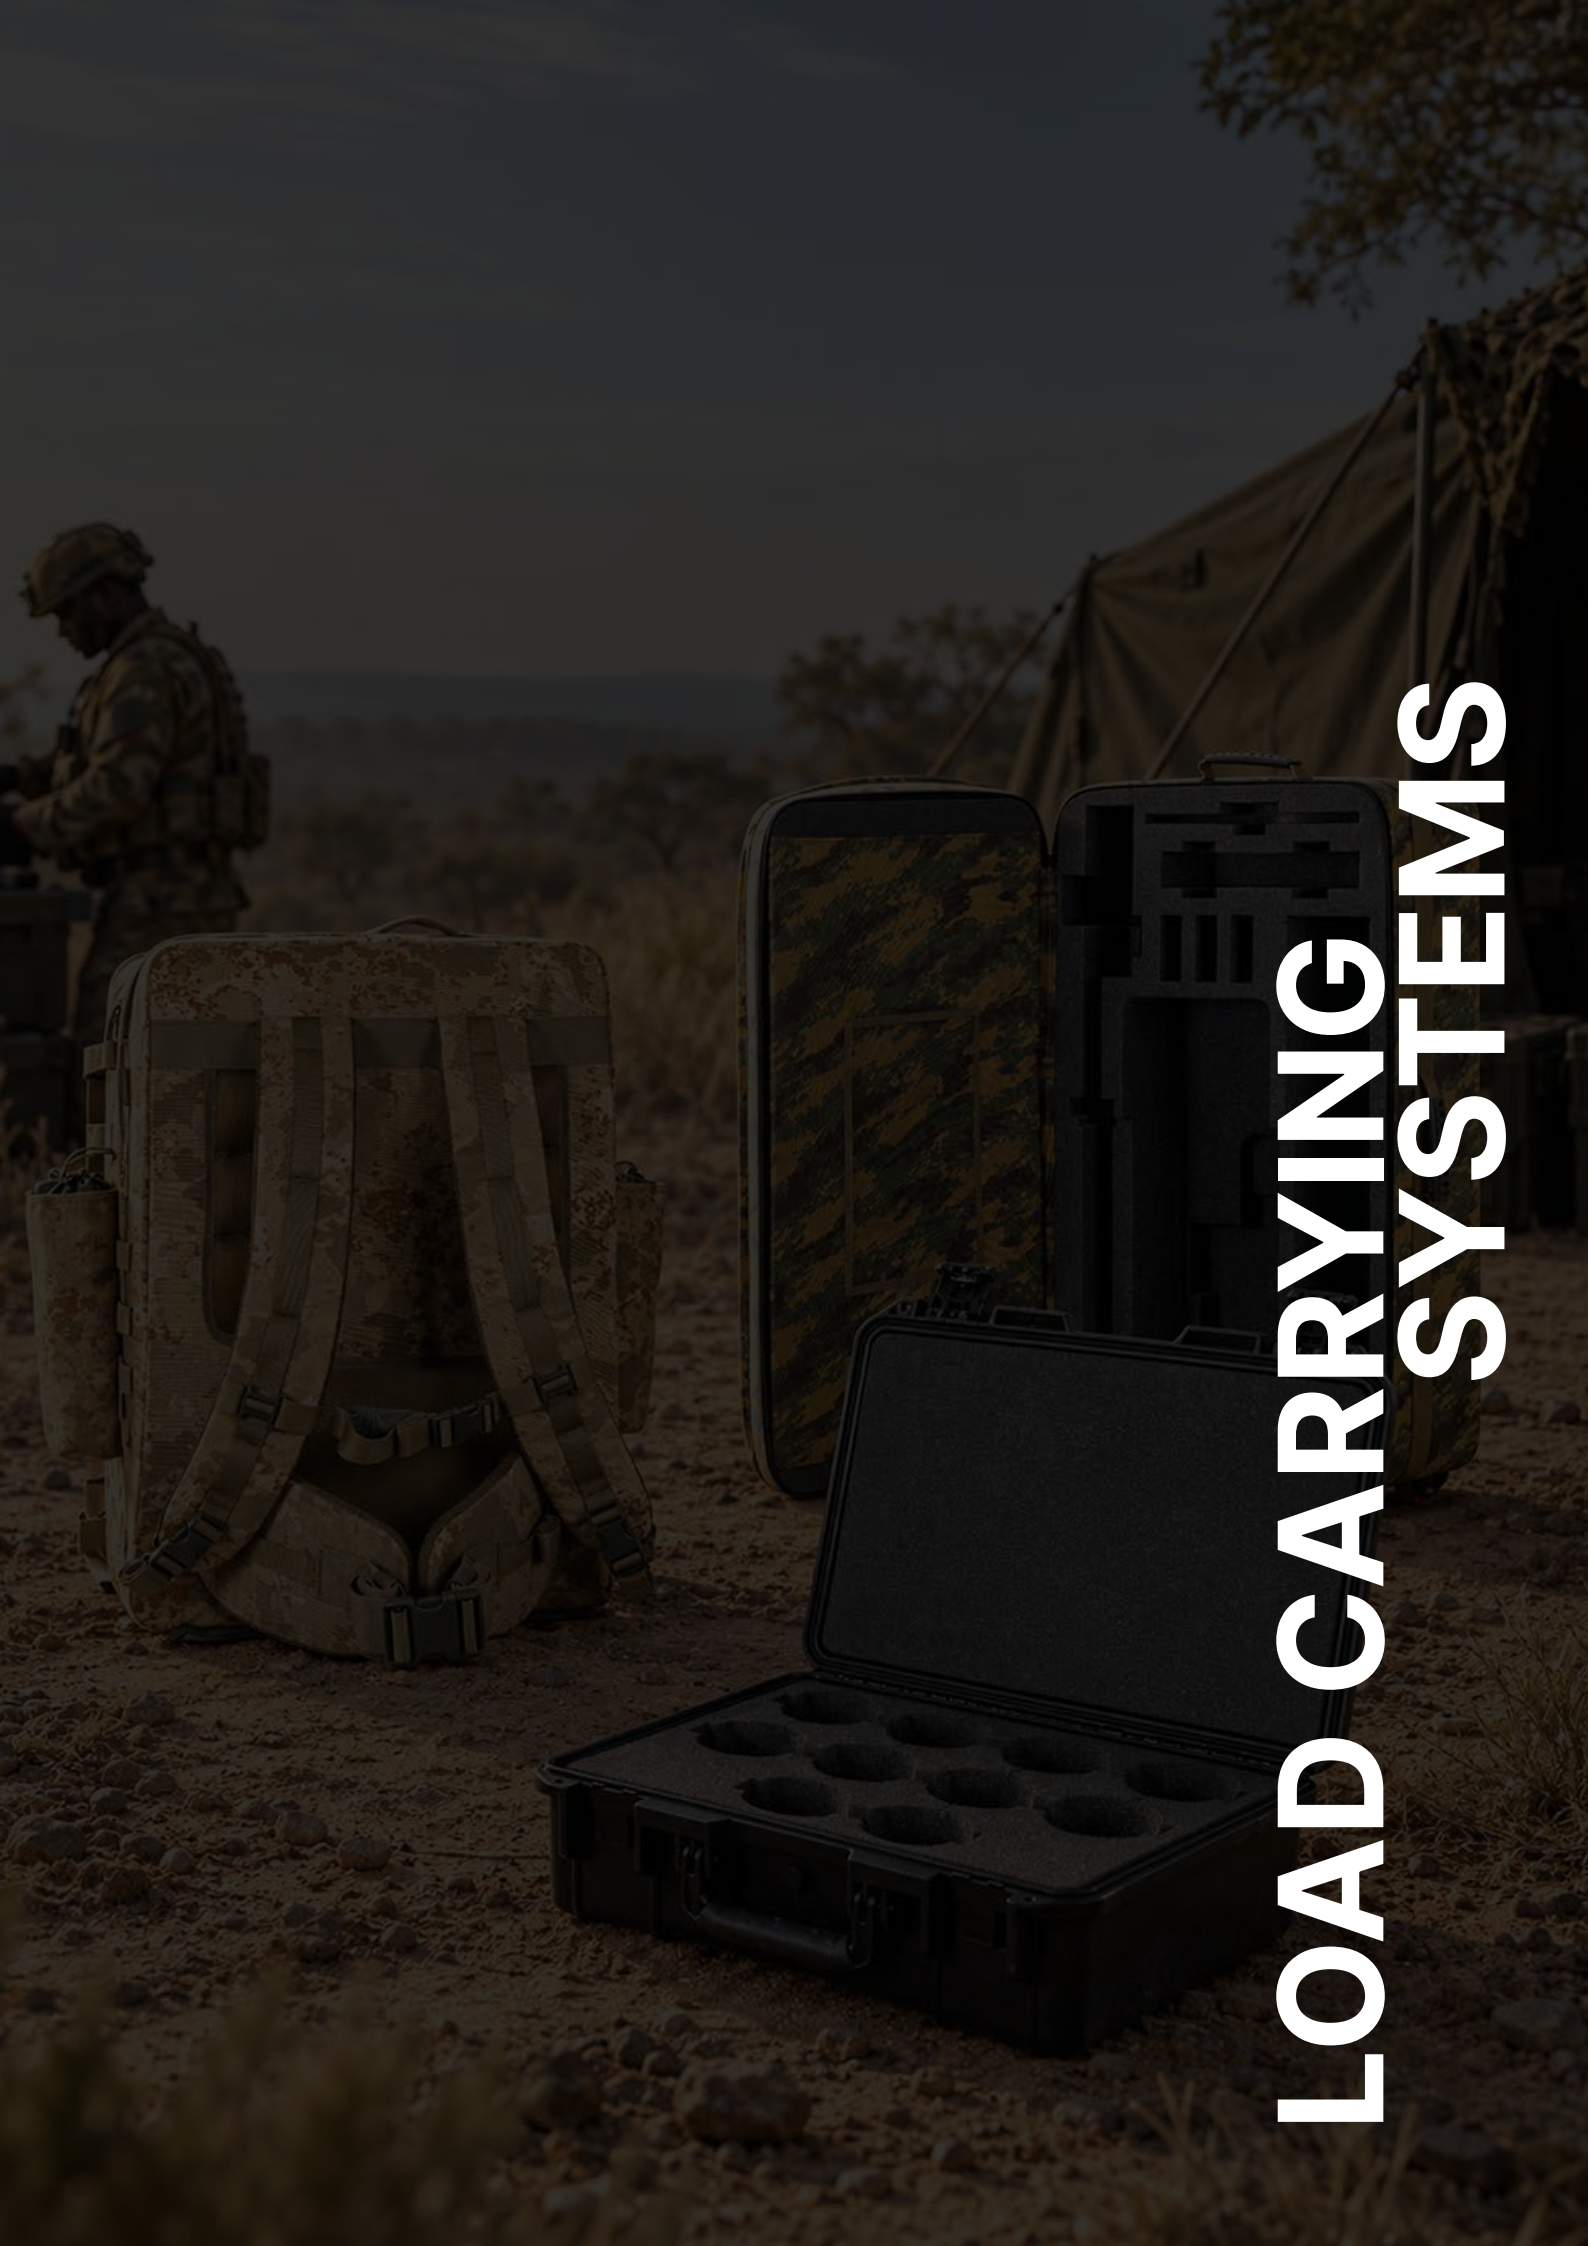

Mummy shape for retention of body heat, Siliconised synthetic insulation is soft to the touch Elasticated drawcord-adjustable hood insulated shoulder baffle to help retain warmth.

Two-way side zips with insulated baffle behind, Anti-snap zipper webbing tape.

Supplied with a compression stuff sack for easy compact carrying.

LOAD CARRYING SYSTEMS

LOAD CARRYING SYSTEMS

SOFT CASES

Impact-Absorbing Padding: High-density open-cell or closed-cell foam cores cushion equipment against shock, drops, and vibrations.

Abrasion-Resistant Shells: Outer layers made from heavy-duty fabrics resist tears, scuffs, and punctures.

Weather & Water Resistance: Coated fabrics and water-repellent zippers protect contents from light rain, dust, and spills.

Ultra-Lightweight Build: Significantly reduces total travel weight compared to heavy, rigid plastic or aluminum hard cases.

Versatile Carrying Options: Equipped with reinforced grab handles, adjustable padded shoulder straps, or hideaway backpack straps for hands-free transport.

Custom Interior Layouts: Utilizes movable hook-and-loop dividers, elastic retention straps, or custom-molded foam inserts to keep items securely in place.

Quick-Access External Pockets: Zippered compartments or mesh pouches hold cables, manuals, batteries, and personal items without opening the main compartment.

HARD CASES

Rovin Guard Hard Case produces high-strength hard case carrying cases designed to keep your equipment safe, even in the toughest field conditions.

Their rigid outer shells provide maximum protection against impact and pressure, while their water- and dust-resistant design keeps your equipment secure in any environment.

Manufactured to military standards, our cases are ideal for safely transporting sensitive devices, firearms, optical systems, medical equipment, and valuable items. The customisable foam inserts inside can be cut to fit equipment of different sizes, providing extra protection against shocks and impacts.

With ergonomic carrying handles, secure locking systems, and long-lasting materials, our hard cases are designed to be a trusted companion for professionals in the field.

Military-Grade Construction: High resistance to impact, water, dust, and chemicals.

Shock-Absorbing Foam Interior: Custom-cut foam keeps devices securely in place.

Air and Pressure Regulation: An automatic pressure-release valve helps ensure safe transport.

Custom Compartments and Modular Design: An optimised interior for drones, batteries, controllers, and other equipment.

Certified Protection: Durability-tested materials designed for demanding terrain.
