MEDICAL KITS

TACTICAL MEDICAL BACKPACK

Comprehensive Trauma & First Aid System

Engineered for field medics, search-and-rescue teams, and first responders, this heavy-duty medical backpack comes fully integrated with a comprehensive, organized layout to manage mass casualties and critical trauma on the move.

KEY FEATURES

Massive Capacity & Smart Layout: Features a lay-flat, full-clamshell opening for instant access to multi-layered compartments, mesh pouches, and color-coded modules.

Fully Stocked Trauma System: Prefitted with advanced life-saving gear, including airway management tools, chest seals, hemorrhage control supplies, splints, and burn treatments.

Modular Customization: Equipped with removable hook-and-loop pouches, allowing medics to detach specific sub-kits and pass them to teammates.

Ruggedized Ergonomics: Built with water-resistant ballistic nylon, heavy-duty zippers, padded shoulder straps, and a breathable mesh back panel for long marches.

MOLLE Webbing: Exterior rows allow seamless integration of external gear, tourniquet holsters, and hydration bladders.

Reflective & Tactical Options: Features high-visibility reflective strips for civilian rescue, or muted tactical colorways for law enforcement and military operations.

The ultimate mobile medical station—built to sustain life when operating far from a hospital.

INJURED STABILIZATION STRETCHER WITH BAG

Rovin Guard portable stretches are designed for rapid deployment in critical situations and provides an efficient and reliable solution for emergency patient transfer.

KEY FEATURES

Ultra-Lightweight & Foldable: Easy to carry, store, and deploy within seconds.

Heavy-Duty Construction: Built with high-strength, water-resistant oxford fabric and a reinforced aluminum frame.

Pocket Stretcher

Injured stabilization
Its foldable design and portable small bag make it practical.

TACTICAL HYDRATION BLADDER

LEAK-PROOF MILITARY-GRADE RESORVOIR

Engineered for hands-free hydration during high-intensity operations, this heavy-duty hydration bladder fits seamlessly into tactical backpacks and vests to keep you fueled without slowing you down.

KEY FEATURES

Military-Grade Durability: Constructed from abrasion-resistant material that withstands heavy pressure without bursting.

Leak-Proof Slide Opening: Features a wide-mouth top slide closure for lightning-fast refills, easy ice insertion, and effortless inside-out cleaning.

Quick-Click Connect System: Detachable hose automatically seals when disconnected, preventing leaks while routing tubes through backpack ports.

High-Flow Bite Valve: Equipped with a 360-degree soft bite valve, an easy-to-use on/off locking switch, and a protective dust cover.

Insulated Drinking Tube: Coated in a rugged thermal sleeve to protect the hose from kinking and to keep water cool in scorching heat or unfrozen in sub-zero climates.

Low-Profile Design: Internal baffle spine distributes water evenly to prevent sloshing and keeps the bladder flat against your back.

Stay sharp, focused, and hydrated—built to endure the toughest missions and harshest wilderness trails.
